

ENVIRONMENTALLY-FRIENDLY PACKAGING

Our packaging is made from recycled material.

It is important for our company to be able to provide our customers with an environmentally responsible alternative when they purchase our products.

Cardboard boxes are receiving recognition today as a more environmentally-friendly product than other types of boxes!

- Our boxes are composed of three layers of recycled material.
 - The 2 outer layers of paper are made from 30% recycled materials
 - The fluted (pleated) paper reinforcement between the outer 2 layers is made from 100% recycled materials
- No hazardous chemicals or resources are used in the manufacture of our boxes.
